## SUMMARY

Full-stack developer focused on internal tools and automation for real business workflows. Experienced building production systems with React, JavaScript, Supabase (PostgreSQL), Linux and PM2. Proficient **English (C1)**.

## SKILLS

Frontend: React, Vite, React Router, Tailwind

Backend: Node.js, Express, REST APIs, Auth, CRUD

Database & Tools: Supabase, PostgreSQL, Git, Linux, PM2

## EXPERIENCE

**Zona Asist** — Full-Stack Developer (Apr 2025 – Present)

Built an internal ticketing system for device intake, repair task tracking, and workflow status management, used daily by a 5-person team.

Implemented several web systems for customers.

## PROJECTS

**WhatsApp Appointment AI Bot** — Node.js, Linux, PM2, OpenAI API

*Production project (not publicly accessible).*

- Automates lead intake and appointment scheduling for property visits.
- Converts WhatsApp leads into ~18 scheduled property visits per week using AI.

**Zona Asist Dashboard (Ticketing System)** — React, Supabase (PostgreSQL)

<https://zonadashboard.netlify.app/demo>

- Internal workflow app for intake, repair tasks, and status tracking.
- Reduced operational errors by standardizing the intake workflow.

**MoneyMachine (Point Of Sales)** — React, Supabase, Rust (PostgreSQL)

<https://moneymachinepos.netlify.app/demo>

- POS system built to streamline checkout, organize inventory, and track sales in real time.
- Improved inventory control and gave the client clearer visibility into revenue and finances.
- Used daily by a real business to manage inventory and track sales performance.

## EDUCATION

Academlo — Web Development Bootcamp (Graduated Nov 2022) | Self-taught since
